The DigitalLoom
Shaping Ideas into Reality

FOR GENERAL CONTRACTORS · AT A GLANCE

A SYSTEM THAT MAKES DAILY OPERATIONS RUN LEANER

OpsCore

A strong spine for your operations, and a custom slice for every process that slows you down.

WHAT IT DOES
Requests, purchasing, yard, delivery and returns on one operations spine.

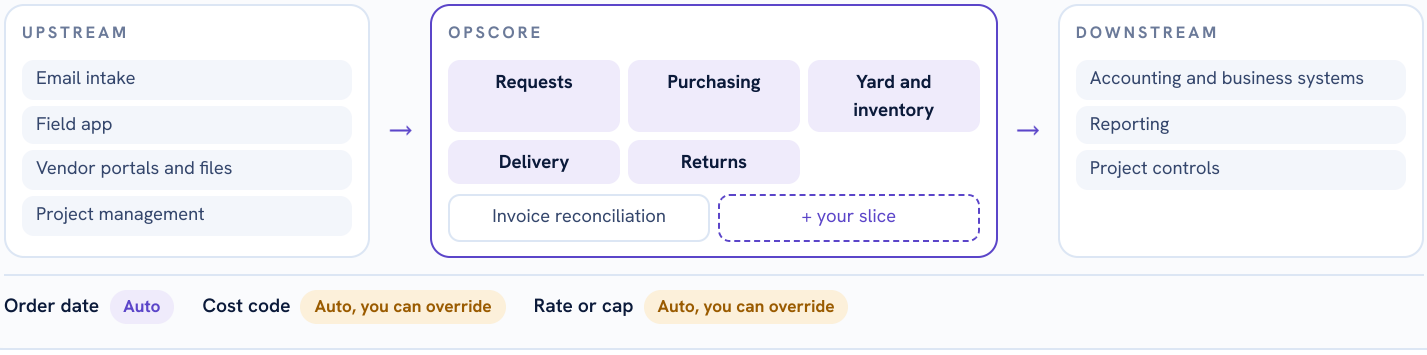

WHO IT HELPS
Operations, field teams, procurement and accounts payable.

HOW
Sits on top of your email and accounting systems, with custom slices for your own processes.

Request from a phone → **Buy** orders and receiving → **Deliver** pick, load, proof → **Return** condition and charges → **Reconcile** invoices, line by line

ON TOP OF THE SYSTEMS YOU ALREADY RUN

Sample setup

Order date Auto · Cost code Auto, you can override · Rate or cap Auto, you can override

What it does for each role

Field team	Request material and tools from a phone, and see when they will arrive.
Project manager	Costs land on the right cost code while they are still being spent.
Procurement	Orders, receiving and agreed rates in one place, with price change suggestions.
Yard and logistics	Pick lists, delivery runs and returns, with proof of delivery.
Controller and AP	Vendor invoices checked line by line before they reach accounting.

Why OpsCore

- **Your systems stay**, it works on top of accounting, project and email tools.
- **Auto, with override**, routine fields fill themselves; people can still change them.
- **Custom slices**, your own process, built on the same spine.

Who we are. The Digital Loom builds software and AI for construction teams, starting from how they already work.
